

Hello! My name is Nana Yeboah and I hold the position of Fundraising Director for the New Jersey Nursing Student, Inc. (NJNS) preprofessional organization. I recently graduated from Capital Health School of Nursing. I will be working at Capital Health Mercer Campus on the Progressive Care Unit.

My education plans do not stop with Capital Health, I plan to obtain my MSN from Drexel University, Pennsylvania. On my free time I love to spend time with my family and friends, and hope for more of that now that nursing school is over.

NJNS has become a very big part of my life. I attended the February 2009 convention as a delegate for my school and was in complete awe. It was a wonderful experience. So wonderful that I knew I did not want it to end there. I ran for the position of Fundraising Director and was successful. Being on the board has taught me so much. I am lucky enough to have such intelligent and caring people to work with. The board has brought out the leader in me. I'm amazed at the impact student nurses have. It is important that student nurses get involved in professional organizations. NJNS is a great organization and I feel really proud to be a part of it.
